

Steel Plate Shoot June 2000 Report

Steel Plate Shoot Saturday, June 10

The turn out was a little light at this month's Steel Plate Shoot, but enthusiasm remained as high as the temperature. The registered shooters, a few guest shooters, and the spectators all seemed to enjoy an interesting course of fire which consisted of 12 reactive targets. Some targets were engaged from cover of a barricade, some in the open, and some shot thru a barrel.

All in all a challenging course, and one which was so well received we intend to modify it by making a few changes and twisting things around to keep the shooters on their toes. With a few changes to the course of fire the next shoot on Saturday July 8th will prove to be another interesting pistol event.
